

ScentDirect™ Tower

FREE-STANDING ATOMIZATION SCENT DIFFUSER

scentair®

Overview:

The ScentDirect™ Tower allows for unobtrusive, free-standing placement of a single ScentDirect system. A removable cap allows for easy access to your ScentDirect system, making adjusting system settings and cartridge changes easy.

The ScentDirect Tower is wrapped in a high-quality polyurethane material surrounding a sturdy stainless steel frame. The ScentDirect Tower houses one ScentDirect system (sold separately) and is a great option when installation on-wall, on-ceiling or track lighting isn't possible and HVAC scent delivery is not available.

Includes ALL ScentDirect features including:

- Advanced atomization technology
- Free-standing placement option
- Side output fragrance delivery
- Patented fan-assisted fragrance delivery for maximum scenting performance
- Adjustable scent intensity settings
- 24-hour clock with programmable events 7-days-a-week
- Low voltage and low power consumption
- Multiple color options: Black, White & Wood Grain
