

Control Unit

Fragrance Bottle

Overview:

The ScentStream™ is a high performance, invisible solution best used to scent large settings. The advanced diffusion technology releases fragrance into existing heating and air conditioning ventilation systems without sprays, aerosols or heated oils. Adjustable scheduling and intensity settings make it flexible and easy to customize the scent output for any environment.

Product Features:

- Virtually silent operation
- Selectable output for 1 or 2 nozzles
- Patent-pending fragrance optimization system
- Provides coverage for large or challenging indoor spaces
- Twenty-four hour clock with programmable weekly events
- Simple and clean replacement of scent oil
- Anti-vibration wall mounts included
- Uses long-lasting 5L container
- Thousands of quality scents to choose from
- Optional duct pressure sensor for more efficient use of oil

ScentStream - Technical Specifications

Dimensions	11.0" (27.9cm) W x 6.0" (15.2cm) H x 5.1" (12.9cm) D (Control Unit)	
	8.0" (20.3cm) W x 11.0" (27.9) H x 6.4" (16.3cm) D (Fragrance Bottle)	
Weight	8.7lbs (3.9kg) (Control Unit)	14.0lbs (6.4kg) (Full Fragrance Bottle)
Coverage	Up to 300,000 cu.ft. (8,500m ³)	
Variable Intensity	5% - 95% in increments of 5%	
Day Timer	7-day, 24-hour timer with 14 event settings	
Power Consumption	35 Watts	
Power Requirements	12V DC, 100-240V AC Power adapter with 6.0ft. (1.8m) cable (UL/PSE/CCC/CE listed)
